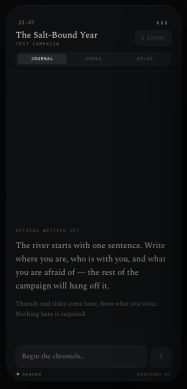
CANON · SOL.2026 · JOURNAL SURFACE · THE CHRONICLE · 390×844 DARK · 19 AUG 2026

The Chronicle

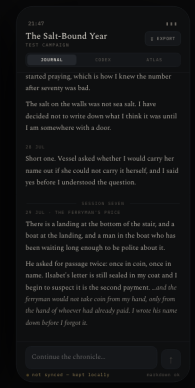
On cold open your own past writing owns the screen — one unbroken river of entries you land at the bottom of, the resume brief collapsible above it, the composer already under your thumb.

TO DESKTOP · The river becomes a centred ~68-character measure with the resume brief and threads docked in a left rail — same single scroll, same pinned composer, no longer computing for 390 pixels.

A · FIRST OPEN
no entries, no threads — the brief becomes an invitation



B · LIVING RIVER — live
tap a thread to resolve · + thread to add · sync line to flip state



C · COMPOSER
idle collapses to one line · focus reveals the optional title

D · SYNC LINE
two states, no others — never claims more than it knows

E · EXPORT SHEET
one release-cool option, stated as a fact and a file

F · DESIGN TOKENS
implementation reference — values are canon

COLOR

	canvas / behind app	#0A0A0B
	app surface, header, composer bar	#0D0F10
	brief card fill	#101518
	raw track, export sheet	#141619
	input fill, quiet button fill	#161719
	active nav pill	#23262B
	hairline / list divider	#1C1F23
	structural border (header, composer)	#1B1D20
	input border, idle	#22262B
	input border focused · thread checkbox	#3A3F46
	accent — labels, save, resolved mark, local dot	#C9A24A
	accent hover	#E0B04A

COMPONENT STATES & RULES

COMPOSER
idle: 1 row, border #22262B, no title field, save disabled (#15171A / glyph #4F4A44); focused or has text: 6 rows, border #3A3F46, title field appears above, save fills accent with #0A0A0B glyph.

ENTRY TITLE
optional single line above the composer, mono uppercase, no border but a bottom hairline. Left empty, the saved entry's meta line is date only ("28 JUL"); a titled entry reads "28 JUL · TITLE". Both are correct states.

THREADS
open: empty 15px box, border #3A3F46, text #CFCFBE. resolved: accent-filled box with #0A0A0B ✓, text #6D6860 struck through — present, never removed. Born from the last row of the list: a dashed "+" box and a one-line field, committed by Enter or ADD.

WHERE YOU WERE
expanded by default on cold open; collapsed shows the header plus "N open". With no entries and no threads it is replaced entirely by the first-open invitation — never an empty card.

SYNC LINE
exactly two states, synced: steady #4F8F6A dot, label #7D8B79. not synced — kept locally: accent dot, 2.4s pulse, label #A8885C. No third state, no spinner, no error styling.

EXPORT
one tap from any journal screen. Sheet ships one option: whole campaign as Markdown, named file and size stated, one accent button.

LANG
No Jalera anywhere. Newest text at the bottom; cold open lands scrolled to it. Nothing on screen *is* decorative — every control is implementable as drawn.
